Health Effects Division (H7509C)

Larry Dorsey
Larry Dorsey, Branch Chief
Occupational and Residential Exposure Branch
Health Effects Division (H7509C)

BASF has submitted a study in response to a request for worker exposure data for vinclozolin (Ronilan WP, EPA Reg. No. 7969-53, and Curalan DF, EPA Reg. No. 7969-85). OREB will need the following use information in order to complete the evaluation of worker exposure assessment:

- the amounts of the pesticide which the mixer/loader and applicator are likely to handle **per day and per year** during treatment of turf and ornamentals;
- the amounts of the pesticide which the mixer/loader and applicator are likely to handle **per year** during typical airblast, groundboom and aerial applications.

This information will be used in conjunction with the previous use data provided by Gail Tomimatsu, who has informed me that the use pattern provided in our earlier meeting has not changed.

Copies of the labels are attached. If you have any further

Recycled/Recyclable
Printed with Soy/Canola Ink on paper that
contains at least 50% recycled fiber

questions, please call me at 305-7775.

Thank you for your kind cooperation in this matter.

CAUTION

Precautionary statements

Harmful if swallowed, inhaled or absorbed through skin. Causes eye irritation. Do not get on skin, in eyes or on clothing.

When applying this product—wear goggles or face shield, chemical-resistant gloves, coveralls or long-legged pants, socks, long-sleeved shirt and chemical-resistant boots or shoes or shoe coverings. When mixing or loading or when adjusting, repairing or cleaning equipment, wear chemical-resistant gloves extending above the wrist, a chemical-resistant apron, long-legged pants, socks, long-sleeved shirt and chemical-resistant boots or shoes or shoe coverings. Avoid breathing vapor or spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before re-use.

Application with airblast equipment must be from an enclosed tractor cab or applicator must wear a one- or two-piece protective suit of cotton or coveralls that covers all parts of the body except the head, hands and feet that are worn over a long-sleeved shirt and long pants. Wear chemical-resistant gloves, and chemical-resistant shoes, shoe coverings or boots, and a chemical-resistant hat, and a pesticide mask or respirator jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH). Wash thoroughly with soap and water after handling or use of this product, and wash contaminated clothing and protective equipment thoroughly before re-use.

Statement of practical treatment

If on skin: Wash with plenty of soap and water. Get medical attention.

If inhaled: Remove victim to fresh air. If not breathing give artificial respiration, preferably mouth to mouth. Get medical attention.

If in eyes: Flush with plenty of water. Call a physician if irritation persists.

Environmental hazards

This product is toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

Net contents 5.5 lbs.

BASF Corporation

PO Box 13528, Research Triangle Park, NC 27709

Specimen Label

Tank mix product should be added in the following sequence after the tank has been $\frac{1}{2}$ - $\frac{3}{4}$ filled and agitation has been started:

1. Add wettable powders to the tank first, allowing them to completely suspend in the tank before proceeding. This process can be hastened by pre-mixing the product in water before adding to the tank.
2. Add flowables (Curalan DF) or suspensions next.
3. Add emulsifiable concentrates last.
4. Add the remaining amount of water. Do not leave tank mix combinations in the spray tank for prolonged periods without agitation. Mix and apply the same day.

Tank mix compatibility test
Any other product that is to be used with Curalan DF should be checked for compatibility. Using a quart jar, check the compatibility of the product using the following procedure:

1. Use only water from intended source and at the source temperature. Fill the jar $\frac{1}{2}$ - $\frac{3}{4}$ full.
2. Add $\frac{1}{4}$ oz. (1½ teaspoons) of Curalan DF to the water for each 1 oz./1000 sq. ft., or, if a liquid, 1 teaspoon for each pint of recommended rate.
3. Add the remaining water in the jar, cap, invert for 10 cycles and let stand for 15 minutes. An ideal tank mix combination will be uniform. The compatibility is questionable if there are any oil film or globules on the surface, fine particle flocculation in the liquid or at the bottom, or clabbering—thickening of the liquid resembling yogurt or a curd-like texture as with cottage cheese.

Curalan DF Application Rates and Timing for Control of Diseases of Turfgrasses

Disease	Application Intervals	Application Rate of Curalan DF**			
		Preventive		Curative	
	Days*	lbs./A	Dry Oz. per 1000 sq. ft.	lbs./A	Dry Oz. per 1000 sq. ft.
Dollar Spot	21-28	2.7	1	5.4	2
Leaf Spots and Melting Out	14-28	2.7	1	5.4	2
Red Thread & Pink Patch	14-28	2.7	1	5.4	2
Brown Patch**	14-28	2.7	1	5.4	2
Gray Snow Mold	10-21	5.4	2	11.0	4
Fusarium Patch & Pink Snow Mold	10-21	5.4	2	11.0	4

* Re-treat at shorter intervals or use higher rates if conditions which are favorable to disease development exist.

** To control existing infections, apply at curative rate. Apply subsequent treatments at the preventive rate once control has been achieved.

Restrictions and Limitations

In tank mixes, read and follow restrictions on the Curalan DF and the respective tank mix product label. The most restrictive labeling applies to tank mixes.

Do not apply Curalan DF through any type of irrigation system.

Do not apply more than 12 lbs. of Curalan DF per acre in one year.

Do not apply to areas likely to be grazed by livestock and do not feed clippings to livestock or poultry.

General Information

for ornamental disease control
Curalan DF is effective for disease control on many ornamental plants. Curalan DF will control *Botrytis* spp. on all herbaceous and woody ornamentals listed on page 4. Curalan DF will also control *Ciborinia*, *Monilinia*, *Ovulinia*, *Sclerotinia* and *Stromatinia* on certain herbaceous and woody ornamentals listed on page 4.

Other uses of Curalan DF include:
Fogging operations.

Dips of cut flowers, rose budwood, bare-root nursery stock, bulbs, and corms.

Sprays to field grown flowers.

See specific recommendations on page 4.

Notes to user: Operator must wear a one- or two-piece protective suit of cotton or coveralls that covers all parts of the body except the head, hands and feet that is worn over a long-sleeved shirt and long pants. Operator must wear chemical-resistant gloves, and chemical-resistant shoes, shoe coverings, or boots, and a chemical-resistant hat, and a pesticide mask or respirator jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH). Wash thoroughly with soap and water after handling or use of this product, and wash contaminated clothing and protective equipment thoroughly before re-use. Best results are obtained with treatments made late in the day. Treated area should be ventilated early the next morning. Avoid inhaling vapors. Never fog plants with wet foliage or plants under water stress. Poinsettias should not be fogged once bracts begin to show color.

Cut flowers—gladiolus and rose

Usage: Prevents Gray Mold (*Botrytis gladiorum*) on gladiolus spikes and *Botrytis cinerea* on roses in cold storage or transit.

Application rates and timing: As a postharvest dip, dip flower buds 3 to 4 seconds in solution of 1.5 to 3.0 lbs. Curalan DF per 100 gallons of water after grading and prior to cold storage. Addition of wetting agent will enhance spreadability. Maintain suspension by agitation.

Rose budwood and bareroot nursery stock

Usage: Prevents Gray Mold (*Botrytis cinerea*) on budwood and nursery stock in storage.

Application rates and timing: Use as a spray or dip. Spray to runoff, or dip plants in 1.5 lbs. Curalan DF per 100 gallons of water. Maintain suspension by agitation. Use after harvest and prior to storage.

Bulb and corm

Plant types: Gladiolus, Hyacinth, Iris, Lily, Narcissus, Scilla, Tulip.

Application rates and timing: As a dip, use a solution containing 1.0 to 2.0 lbs. Curalan DF per 100 gallons of water. Maintain suspension by agitation. Use after harvest and prior to storage.

Field grown flowers

Usage: Controls Gray Mold (*Botrytis* spp.) during production.

Application rates and timing: For aerial application, use 1.5 lbs. Curalan DF in 20 to 25 gallons of water per acre. Apply when conditions for disease prevail. Repeat every 10 to 14 days as needed.

For ground application use a solution containing 1.5 to 2.0 lbs. Curalan DF per 100 gallons of water. Repeat every 10 to 14 days as needed.

Notes to user: Due to variability within species and in application techniques neither the manufacturer nor the Seller has determined whether or not Curalan DF can safely be used on all varieties and species of nonbearing food crops,

trees, shrubs, ornamentals, bedding plants, ground covers, nursery and other nonfood crops under all conditions. It is therefore recommended that the professional user determine if Curalan DF can be used safely prior to broad use.

This determination can be made in the following manner: On a small test area apply recommended use rate of Curalan DF on a non-labeled species or variety under the conditions expected to be encountered. Any adverse effects should be visible within 14 days.

Restrictions and limitations

Do not apply more than a total of 12 pounds of product per acre in one year.

Do not apply this product through any type of irrigation system.

Spray Solution Table for Ornamental Uses

Rates of Curalan DF to use with different amounts of desired spray solution.

Gallons of Water	Rate of Curalan DF					
	1/2 lb.	3/4 lb.	1 lb.	1 1/2 lbs.	2 lbs.	3 lbs.
100	4 oz.*	6 oz.	8 oz.	3/4 lb.	1 lb.	1 1/2 lbs.
50	2 oz.	3 oz.	4 oz.	6 oz.	8 oz.	3/4 lb.
25	1.6 oz.	2.4 oz.	3.2 oz.	4.8 oz.	6.4 oz.	9.8 oz.
20	0.8 oz.	1.2 oz.	1.6 oz.	2.4 oz.	3.2 oz.	4.8 oz.
10	1 1/4 Tbs.	1 3/4 Tbs.	2 1/4 Tbs.	3 1/3 Tbs.	4 1/2 Tbs.	6 2/3 Tbs.
5	2/3 tsp.	2/3 tsp.	1 1/3 tsp.	2 tsp.	2 2/3 tsp.	4 tsp.

*Dry ounce

The following is a list of diseases discussed in this labeling:

Diseases	
Common Name	Scientific Name
Anthracnose	<i>Colletotrichum graminicola</i>
Brown Patch	<i>Rhizoctonia solani</i>
Dollar Spot	<i>Sclerotinia homoeocarpa</i> ; <i>Lanzia</i> sp.; <i>Moellerodiscus</i> sp.
Fusarium Patch; Pink Snow Mold	<i>Fusarium nivale</i> ; <i>Microdochium</i> sp.
Gray Mold	<i>Botrytis cinerea</i>
Gray Snow Mold	<i>Typhula incarnata</i>
Helminthosporium Leaf Spots	<i>Drechslera</i> spp.
Melting Out	<i>Bipolaris</i> sp.
Pink Patch	<i>Limonomyces roseipellis</i>
Red Thread	<i>Leetisaria fuciformis</i>

SUPPLEMENTAL LABELING

RONILAN®WP FUNGICIDE

(EPA Reg. No. 7969-53)

RECEIVED

Under the
Fungicide
Registration
Act
EPA Reg. No. 7969-53

For Control of Diseases on Turfgrass

FOR PROFESSIONAL USE ONLY. NOT INTENDED FOR DOMESTIC USE, EXCEPT BY PROFESSIONAL APPLICATORS.

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty on the EPA-registered label are to be followed. This labeling must be in possession of the user at the time of application.

Re-entry and Workers' Protection Statement

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons.

Do not enter treated areas without protective clothing until sprays have dried.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

RONILAN is effective on all turfgrasses for control of Dollar Spot (Sclerotinia homoeocarpa); Helminthosporium Leaf Spots and Melting Out (Drechslera spp) Pink Patch and Red Thread (Limonomyces roseipellis and Laetisaria fuciformis, respectively); and Fusarium Patch (Fusarium nivale) if prolonged snow cover does not occur.

Tank mixes of RONILAN and FUNGO-50 effectively control the above diseases plus complexes of Brown Patch (Rhizoctonia solani) and Anthracnose (Colletotrichum graminicola) on all turf grasses.

TIME, RATE AND METHOD OF APPLICATION

Apply indicated rates of RONILAN in 2-4 gal. of water per 1,000 sq. ft. of turf after mowing and allow foliage to dry before irrigation. 6

RESTRICTIONS AND LIMITATIONS FOR TURFGRASS

Do not exceed label rates.

Do not irrigate until sprays have dried.

Do not mix RONILAN with any product which has a label prohibition against mixing with RONILAN or VORLAN.

Do not apply this product through any type of irrigation system.

CONDITIONS OF SALE AND WARRANTY

The Directions for Use of this product reflect the opinion of experts based of field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the inherent risks referred to above. BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL BASF OR THE SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
